

ABBY MODELL

**Contemporary Glass Artist exhibits her 'Galaxy Collection' at
2016 Architectural Digest Design Show, Booth #M-500**

New York, NY

Abby Modell will present her contemporary glass art at the 15th Annual Architectural Digest Design Show in Booth #M-500 at Piers 92 & 94, 55th Street, 12th Avenue in New York City from March 17 – 20, 2016.

Abby Modell's new '**Galaxy Collection**' features her three dimensional wall art and large sculptural objects. Focusing on transparencies and refracted light, **Modell** creates work that is inspired by the natural swirling formations of the stars, planets and the infinite dimension of the night sky.

Previewed within the collection will be **Modell's Celestial Ocean**, a free form artistic interpretation of extraterrestrial liquid water. Fluid organic shapes effortlessly float across the artist's wall canvas, depicting an imaginary celestial ocean. Watercolor glass forms highlighted with silvered mirroring and Swarovski crystals create a tranquil tidal flow.

Modell will also present new pieces from her '**Starburst Collection**' of 4' x 6' framed art glass assemblage mirrors. She plays with depth and perception by adding textural objects, including blown and dichroic glass, with matte and gloss finishes, and Swarovski crystals. Ultra-luminous glass mimics **Modell's** vision of supernova bursts of light, creating vibrant star formations. Additionally new large galactic vessels will be shown, focusing on layered elements within the work.
