## NEWS RELEASE

### **Dacor built-in refrigeration delivers fresh food preservation alternative**

*Ultra-premium refrigeration products offer the perfect complement to a full line of luxury cooking appliances*

**LOS ANGELES, CA** – [Dacor®](#), a leading manufacturer of ultra-premium kitchen appliances, introduced its latest innovation, the Discovery® 36- and 30-inch Fully Integrated Refrigerator. This new line of fully integrated refrigeration is the perfect addition to Dacor’s best-in-class cooking products. Kitchen designers can now specify the complete Dacor kitchen and be confident the refrigeration products will offer the high level of quality, craftsmanship and performance that home chefs have come to expect from Dacor’s cooking products.

“We offer innovative appliances that empower home chefs and help them cook with the freshest ingredients,” said Dacor President and CEO Chuck Huebner. “As a result of the dual-compressor and dual-evaporator cooling system, the Discovery Refrigeration line provides top-of-the-line food preservation. This refrigerator gives home chefs a new level of quality and style to elevate their cooking experience.”

**[TWEET THIS: Discovery Refrigerator from @DacorKitchen brings quality, craftsmanship & performance to the #kitchen http://bit.ly/1O40aiE](#)**

The new Discovery Fully Integrated Refrigerator incorporates numerous exclusive features including FlushFit™, a patented hinge system that allows seamless, built-in installation for today’s luxury kitchen. The new hinge system also ensures balanced movement, stability and flush installation of custom panels with nearly zero clearance of the adjacent cabinets required.

“Our new refrigeration line incorporates intelligent, intuitive design inside and out,” said Huebner. “The flush composition is what designers are looking for and the spacious interior offers ample storage that is a necessity for the passionate cook.”

Other exclusive features include SoftShut™ drawers that quietly pull the drawers closed with ease, white commercial grade interiors, Glass Touch controls, stylish LED lighting, and Dacor’s distinctive BeadBlast™ finish on all stainless crisper bins and trims. This unique process provides a scratch-resistant surface that is impenetrable by bacteria and odors for extended food preservation.

(MORE)

The flexible FreshZone™ drawer can be converted from freezer to fridge or used as a fresh food compartment. With its advanced vacuum insulation panel technology, the Discovery Refrigeration line also meets the Department of Energy's newest energy efficiency standards.

The Discovery 36- and 30-inch Fully Integrated Refrigerators are available in three configurations: stainless steel "Pro Style" with top compressor, stainless steel with bottom compressor or custom panel ready with bottom compressor. All configurations are available with left- or right-side hinges.

#### About Dacor

Founded in 1965, Dacor is a leading manufacturer of ultra-premium kitchen appliances. Designed and built in California, Dacor's cooking appliances integrate function and technology to create high-performing, intuitive products that reflect the lifestyle and needs of the passionate cook. Dacor is also the first and only ultra-premium appliance brand to be tested and recommended by the Master Chefs of Le Cordon Bleu. Le Cordon Bleu is considered the world's most respected culinary arts and hospitality educator. Dacor's full-suite of award-winning appliances include ranges, cooktops, wall ovens, refrigeration, ventilation and wine preservation. Family-owned for more than 50 years, the company is responsible for many of the innovations that have improved the way people cook in the modern kitchen. [www.dacor.com](http://www.dacor.com)
