**NanaWall Reinvents the Kitchen With Unique  
Dual-Height Window/Door Combination**

**SAN FRANCISCO, CA** – NanaWall Systems continues to evolve the indoor/outdoor kitchen trend with Kitchen Transition—an innovative system that adds versatility to kitchens without adding additional square feet. The NanaWall Kitchen Transition is a combination of the company’s opening glass windows and opening glass walls, creating a solution for families that offers maximum flexibility to kitchens.

Reinventing the heart of the home, Kitchen Transition creates an open floor plan that flows naturally into the outdoor dining area for social gatherings, brings in fresh air and ventilation while cooking, and blurs the line between the indoors and outdoors to provide the ultimate entertaining space.

“Kitchen Transition is the perfect solution for builders and homeowners to create an outdoor kitchen with a sense of spaciousness for everyday use and entertaining,” said NanaWall Systems CEO Ebrahim Nana. “The window/wall combination is an innovative way to enjoy the benefits and beauty of an outdoor kitchen.”

The Kitchen Transition Folding System is a dual-height window/door combination that allows the window and wall portions of the kitchen to open and operate independently; any combination can be created for virtually any kitchen that faces a backyard, courtyard or deck.

The innovative Single Track Sliding System offers the option of zero floor track (for pristine countertops) and hidden pocketed panels, which will be on display at the annual NAHB International Builders’ Show (IBS) from Jan. 19-21, 2016 at booth #C3843.
