NEWS RELEASE

NanaWall to Showcase Indoor/Outdoor Design Trends at AD Show
Company to Highlight Benefits of Floor Supported Options for Opening Glass Walls

SAN FRANCISCO, CA – NanaWall Systems will showcase [Floor Supported Technology](#) at the [Architectural Digest Design Show](#) from March 17-20, 2016 in booth #150. As the leading innovator of the opening glass wall category, NanaWall offers aluminum, wood-framed, clad and all-glass products, which continue to lead in performance, aesthetics and durability.

“The versatility of our opening glass wall systems allows design professionals to blur the line between the indoors and outdoors, providing an enhanced indoor/outdoor lifestyle for homeowners,” said NanaWall Systems CEO Ebrahim Nana. “Our products are inspiring new design trends while leading the industry in energy efficiency and extreme weather protection, without compromising aesthetics.”

NanaWall created a Dedicated Design Team to help guide designers, homeowners and architects to choose the ideal NanaWall system—speeding up the design process. Many applications such as retrofits, remodels, and environments with snow loads offer challenges that the Dedicated Design Team’s expertise can help solve. NanaWall Floor Supported Technology offers the perfect solution for these applications by carrying the weight on the floor, thereby eliminating the need for costly building modifications.

Featured at the show, the NanaWall SL60 delivers superior weather performance, beautiful aesthetic design, and offers an optional floor supported technology. It is available to open inward or outward, offering maximum flexibility for each project’s design. The SL60 also offers swing door capability—either attached to the side jam or within the chain of folding panels.

NanaWall Systems allows design professionals to blur the line between the indoors and outdoors in any environment.

NanaWall is the first company to offer a complete line of both floor supported and top-hung glass wall systems.

About NanaWall Systems

Celebrating its 30th anniversary, NanaWall Systems redefined the category of opening glass wall systems. During its 30-plus years in business, the company has earned the trust of architects, builders, design professionals and homeowners as a custom solution for re-imagining how buildings, people and the elements interact. By combining precision engineering and outstanding design options throughout more than 25 unique award-winning systems, NanaWall Systems advances design possibilities beyond the conventional for almost any space. NanaWall Systems is headquartered in the San Francisco Bay Area, with 22 showroom and design studio locations across North America. NanaWall Systems is the exclusive North American partner of Solarlux Germany, the world leader in opening glass wall technology.

About Architectural Digest Design Show

The 2016 Architectural Digest Design Show will showcase design offerings from more than 400 brands, including well-known manufacturers and independent makers. Located at New York’s Pier 92 and 94, the show features the latest state-of-the-art appliances and new collections from top furniture designers. With more than 117 new exhibitors this year—69 of them in the show’s craft-centric Made section—the show is full of up-and-coming designers creating furnishings, ceramics, and textiles, many of them based in the U.S.
