

## Liebherr Appliances Introduces New HWg 1803 Seamless Wine Storage Cabinets

**Modern, Innovative and Easy-To-Use Storage Options for Your Finest Wines**

**Miami, FL – October 2016 – Liebherr Appliances** introduces the innovative and superbly designed **HWg 1803 wine cabinets**, designed for today's modern kitchen. Featuring high-performance technology alongside easy-to-use features, the **HWg 1803** cabinets prove it's possible to save energy without compromising convenience and design.

The **Liebherr HWg 1803** series wine cabinets are designed for niches 17.5" high, and are fitted a pull-down door, allowing for multiple design options and optimal use. Available in chic white (**HWgw 1803**) or elegant black (**HWgb 1803**), these front-reflective GlassEdition wine cabinets are manufactured using back-printed glass for a spectacularly stylish finish, ideal for a kitchen, bar, or great room. The back-printed glass is easy to clean and scratch resistant for increased durability over the lifetime of the cabinet. When the glass door is gently tapped, TipOpen technology partially opens the door, offering the perfect solution for seamless integration in hands-free kitchens. If the door is not opened fully within three seconds, the door will self-close.

With advanced energy efficiency, these compact **HWg 1803** wine storage cabinets are equipped with the latest in climate technology, with details necessary for optimal wine storage and tempering. An easy-to-read LCD screen guarantees exact temperature adjustment between 41°F and 68°F. The dimmable, vertical LED lighting provides enhanced illumination throughout the interior, offering a better view of the stored bottles. Thanks to the minimal heat emitted by the LED lights, stored wines can be illuminated and beautifully presented for extended periods of time without compromising their quality. The doors are fitted with tinted, insulated safety glass to ensure protection against damaging UV radiation, ensuring vibrant color, quality, and taste of the wine.

The **Liebherr HWg 1803** wine cabinets feature secure, handcrafted shelves, made from untreated beech wood, which are designed to offer safe storage for up to 18 Bordeaux bottles. Mounted on telescopic rails, these wooden shelves can store bottles vertically, horizontally, and at different angles, depending on bottle size. Additionally, the **HWg 1803**'s have a noise level of 32 dB(A)\*, making these units virtually silent. These features make the units ideal for the premium wine collector and frequent entertainer.
