NanaWall announces Kitchen Transition with new RemoteSTACK feature
Proprietary feature stacks panels away from kitchen openings for maximum flexibility

SAN FRANCISCO – [NanaWall Systems](#)—the pioneer of the opening glass wall category—continues to evolve the indoor/outdoor kitchen trend by offering Kitchen Transition with RemoteSTACK, which enables architects to free up valuable space in the kitchen by stacking panels away from the opening. This gives architects control to design around structural obstacles and remove the panels from view, creating a solution for homeowners that offers maximum space flexibility.

“Kitchen Transition is the perfect solution for architects and homeowners to create an indoor/outdoor kitchen with maximum flexibility,” said NanaWall CEO Ebrahim Nana. “When used in conjunction with RemoteSTACK, the panels can stack anywhere, creating an open floor plan that is spacious for everyday use and entertaining.”

TWEET THIS: [Continuing the indoor/outdoor kitchen trend, @NanaWall's #Kitchen Transition is now offered with RemoteSTACK, which enables architects to free up valuable space in the kitchen by stacking panels away from the traditional opening <https://youtu.be/66DIkbrVGbl> #glasswallsystems](#)

The Kitchen Transition is available in two different configurations: as a Folding System or a Single Track Sliding System. The innovative Single Track Sliding System offers the option of zero floor track (for pristine countertops) and hidden pocketed panels with RemoteSTACK. The Kitchen Transition Folding System is a dual-height window/door combination that allows the window and wall portions of the kitchen to open and operate independently; any combination can be created for virtually any kitchen that faces a backyard, courtyard or deck.

RemoteSTACK makes it possible to completely remove the glass walls from the opening and stack the panels anywhere—along the side of the room, in a different room, or in hidden pocketed panels—even for residences with immovable load-bearing pillars in the middle of the floor plan. It is available in aluminum, solid wood, and frameless designs.
