**Zephyr Introduces 24-Inch Chimney-Style and Under Cabinet Ventilation Hoods**

***Anzio and Pisa Maximize Small Kitchens With Big Design and Technology***

SAN FRANCISCO, February X, 2018—[Zephyr](#) has elevated the kitchen through design, discovery and care by creating unexpected experiences in the ventilation category and beyond. Today, the San Francisco-based company expands its collection with the introduction of [Anzio](#) and [Pisa](#) 24-inch range hoods. Developed for vertical living projects and compact kitchens, Anzio and Pisa are the ideal hoods that combine sleek design with powerful ventilation performance.

The small space living trend continues its popularity in urban areas where millennials are prioritizing location and efficiency, yet still want the best appliances and contemporary design. A recent study by Urban Land Institute (ULI) found that micro apartments are on the rise across America and units smaller than 600 square feet had higher occupancy rates than bigger units. This highlights the trend that in certain metropolitan and coastal regions, consumers prefer smaller homes. And with the housing market continuing to rise, consumers are starting off in smaller homes and investing in updates such as kitchen and bath remodels.

“Limited space in the kitchen shouldn’t mean limited design options,” says Luke Siow, Zephyr President. “We’re committed to giving builders and developers as many ventilation options as possible and the Anzio and Pisa are excellent solutions for high rise and condo developments.”

The Anzio 24-inch is a low-profile, stainless steel chimney-style hood that will add style and sophistication to any kitchen. Complete with a 600 CFM blower, BriteStrip™ LED Lighting, and ICON Touch® Controls, Anzio also features Zephyr’s Airflow Control Technology™ (ACT™). ACT is a technology exclusive to Zephyr that gives builders and developers the freedom to install range hoods with maximum blower CFM to meet local requirements, without having to compromise power or design. Additional features include: aluminum mesh filters, duct cover extension kit, optional recirculating kit, optional hybrid baffle kit, and optional make-up air kit.

Pisa 24-inch under cabinet hood works quietly and beautifully out of sight. Its retractable glass visor controls the hood’s 290 or 500 CFM blower and halogen lights. Available in white or stainless steel with glass, Pisa is perfect for kitchens that are limited on space and require a discreet look. Additional features include: mechanical slide controls, halogen lights, aluminum mesh filters and optional recirculating kit.

### About Zephyr

Founded by a family in 1997, San Francisco-based Zephyr continues to pioneer design and innovation to create unexpected experiences in the ventilation category and beyond. The company has challenged the perception of what ventilation means in kitchen design and created a new awareness of the importance of a high performing ventilation system. With acclaimed talent such as artistic visionary Fu-Tung Cheng, and industrial designer Robert Brunner, Zephyr is able to create cutting-edge residential range hoods unlike any other company. As a direct result of its commitment to elevating range hood design and technology, Zephyr is the recipient of several prestigious awards including Consumer Digest Best Buy Rating, Chicago Athenaeum Good Design, ADEX (Awards for Design Excellence), Appliance Design 'Excellence In Design' and the Architectural Products 'Product Innovation Award.'
