

THE GOLD PLANKS COLLECTION + THE TRACKS PLANKS COLLECTION

Woven Walnut in White Gold Dust, the exclusive allure of precious weft

Refined and chic, like the weft of a **precious fabric**. **Precious and glittering**, thanks to the application of white gold dust that gives off shimmering **three-dimensional reflections of light**. *Rich in variegated grain and shading*, the intrinsic characteristics of the wood from which it takes its life, **American Walnut**. These are the three sides to **Woven walnut in white gold dust** parquet by **Cadorin**, a distillate of innovation and elegance.

The Veneto company drew from two of its *patented collections* to make this product: – **Gold Planks and Tracks Planks** – and then *blended them carefully together*. The result is a **totally new product** that is also covered by *international patent* and now ready to take its place in the most exclusive and original homes and yachts.

If **Gold Planks** is the line created for **the demanding luxury lover** with *different finishes in Precious Metal Dust, Gold Leaf, Mother-of-pearl or Gilding*, the big feature of the **Tracks Planks** Collection is the real **relief-work given to the wood**, an absolute novelty in the design of parquet planking. **Walnut in White Gold Dust** combines the quality and aesthetics of both Collections, making it an authentic **element of décor** in its own right that reveals the personality – which in this case can only be distinctive – of the homeowner.

This parquet vaunts a **raised weft surface** never seen before that resembles *knit work that envelopes the entire plank*. Not only is it a real pleasure to touch and see, this special type of **working** known as **Weave** also makes the surface of the wood particularly hard and compact, **increasing its wear resistance** whenever it is used as flooring.
