## CONTEMPORARY ART GLASS

Exhibits her 'Galaxy Collection' at  
2018 Architectural Digest Design Show, Booth #229

New York, NY

**Abby Modell** will present her contemporary art glass at the Architectural Digest Design Show in Booth #229 at Piers 92 & 94, 55th Street, 12th Avenue in New York City from March 22– 29, 2018.

**Abby Modell's 'Galaxy Collection'** features her three dimensional wall art, large sculptural objects and new LED lighting. Focusing on transparencies and refracted light, **Modell** creates work that is inspired by the natural swirling formations of the stars and the infinite dimension of the night sky.

**Modell's 'Cosmic Wave'** is a pop art inspired 9-foot square wall installation that incorporates the artist's three dimensional hand-blown glass. **Modell's** interpretation of galactic water flows effortlessly across the artist's canvas. The imaginary celestial ocean is created of mirrored, translucent and opaque forms with assemblages of Swarovski crystals suspended on top of vibrant saturated pastel panels of gloss glass. Surprising the viewer with an unusual playful palette of colors, **Modell** portrays her contemporary artistic vision of 21st century glass.

**Modell** will also present her new **DiamondDust® Collection** of LED lighting and sculptural objects. Her work combines depth and perception by adding textural objects to blown glass. Focusing on layered elements, **Modell** captures dazzling effects of cosmic reflections.

**DiamondDust®**  
**LunarRock LED Lamp**  
21"H x 12"W

**Cosmic Wave**  
**Wall Installation**  
9'H x 9'W x 6"D

**MoonLight Swirl**  
**Low Vessel**  
5"H x 18"D
