FOR IMMEDIATE RELEASE

TASTE THE PENTAIR EVERPURE DIFFERENCE AT AD 2018 **New Residential Reverse Osmosis System Delivers Clean, Great Tasting Drinking Water** **More Efficiently; to be Showcased at Booth 274**

Hanover Park, Ill. – March 21, 2018 – For more than 80 years, Pentair Everpure has been a trusted water filtration choice of premium coffee houses and restaurants nationwide. Now, the same commercial-grade technology is available for the home.

The Pentair Everpure residential line of luxury water filtration products will be showcased at the Architectural Digest (AD) Show in New York City, March 22 - 25, 2018. Pentair's newest product, the [ROM IV Reverse Osmosis System](#), will be unveiled and premium products, [H-300-NXT](#) and [EF-Series](#), will be on display. Visitors will have the opportunity to sample filtered water on tap at the exhibit.

"Water waste and inefficiency for reverse osmosis systems has long been a concern with users," said Tim Reckinger, Product Line Vice President, Pentair. "Everpure's new ROM IV system features advanced membrane technology to help minimize water waste."

Reckinger adds, "In addition, the aesthetic of this system is a nod to the commercial grade quality taken from our Foodservice division while also being mindful of the high-end kitchen designs that homeowners desire. Our filtration systems fit well under the kitchen sink with their sleek, compact design, and provide clean, great tasting drinking water."

The Pentair Everpure ROM IV carries the [NSF/ANSI 58](#) certification for Reverse Osmosis Drinking Water Treatment Systems. Read more about this certification at www.nsf.org. **AD attendees are encouraged to visit the booth [274] or contact their local Everpure distributor for more information.**
