**NanaWall features innovative design solutions at the
Architectural Digest Design Show 2018**

Company offers versatile opening glass wall systems for any design project

SAN FRANCISCO – [NanaWall Systems](#) will showcase its operable glass wall systems at the [Architectural Digest Design Show](#) in New York, March 22-25 in booth 150. As the pioneer of the opening glass wall category, NanaWall’s products provide aesthetic versatility and architectural solutions to designers and architects. The company will display the [SL80](#) at the show, which is a floor supported system that features extremely energy efficient, narrow frames with the option of either a rounded or angular edge design.

“We’re seeing a definite trend in the design community where designers are blending the indoors with the outdoors through glass wall systems, offering their clients more natural daylight, fresh air ventilation and beautiful, uninterrupted views,” said NanaWall CEO Ebrahim Nana.

See below for new products offered by NanaWall:

- **Cero®**: Cero offers pure architectural minimalism through its clean, uniform and ultra-thin lines for maximum light-filled spaces that connect the interior to the exterior. It offers the largest panes of glass available from NanaWall.
- **ClimaCLEAR™**: NanaWall ClimaCLEAR is the only frameless all-glass individual panel sliding system specifically engineered for transparent weather protection.
- **Kitchen Transition with RemoteSTACK**: NanaWall now offers Kitchen Transition with RemoteSTACK, which enables architects to free up valuable space in the kitchen by stacking panels away from the traditional opening. This gives architects control to design around structural obstacles and remove the panels from view, creating a solution for homeowners that offers maximum space flexibility.
- **SL60/80 Sill Options**: NanaWall continues to provide more options for its SL60 and SL80 folding glass wall systems by offering five sills—Higher Weather Performance Sill, Hybrid Sill, Low Profile Saddle Sill, Flush Sill and Surface Mounted Sill. These sill choices provide flexibility to builders, architects and designers when it comes to building requirements for their projects.
